

SMS enabling your business network is just a matter of time . . .

Text Messaging has become widely accepted as a business communication tool, with new and compelling applications emerging for the business community every day. With over 85% of the UK population carrying a mobile phone, there is no simpler way to keep updated, keep in touch and keep ahead.

Text Message Server features:

- Two-way SMS gateway
- One off server software cost
- Email integration as standard (MS Outlook/Lotus Notes/GroupWise)
- Outlook Plug-in
- Client GUI
- SMS printer driver for integration with all MS Business Objects
- 3rd Party Integration supporting CSV, XML, Web Services, COM API
- Sent and Delivery Notification
- SQL/SQL Express database
- Active Directory Integration
 - NT/2000/2003 Authentication
 - Open Text Fax Server, RightFax Edition, User Authentication
- Complete Audit Trail for Compliance
- Enterprise Reports Utility
- IP delivery with competitive SMS rates
- GMS modem support for IP Failover
- Mirroring and HA DR systems available

Benefits:

- **Discreet:** incoming text alerts can be received silently in business environments allowing the user to respond at their convenience.
- **Fast:** enables information to be sent to individuals and groups quickly.
- **Cost effective:** when needing to stay in touch with colleagues on the road or travelling internationally.
- **Easy-to-use:** sending a text message is as easy as sending an email therefore no need for additional training.
- **Versatile:** TMS has the ability to integrate with virtually any application.

Latest MDA figures show that over 120 million text messages are sent on average every day in the UK, more than double the levels reached three years ago.

One reason behind this staggering growth is that text messaging has moved beyond a 'teenage fad' to become an essential business tool. The first step taken into the mobile office arena, text messaging enables business to conveniently and cost-effectively manage the mobile workforce and replicate the office on the move.
